

RECOMMENDATION

We, Skanska Stålteknik AB, Västerås Sweden, confirm hereby that company Koli sp.z o.o., Gdansk, Poland has performed NDT work for Allébron, Stockholm, Sweden, during prefabrication at Mostostal S.A. Chojnice and during assembly at Gdynia harbour before sea journey to construction site.

The bridge is made totally in steel with complicated cross and longitudinal beams structures and closed box girders. Total weight of the bridge is 611 t.

Koli's scope of work has included both MTI, Ultra Sonic as well as Radiographic examination. Requirements and documentation were based requirements in Swedish codes (such as BSK, Bro 94) and relevant Euronorms.

Koli has performed all their work to our, our clients and their inspectors full satisfaction. Koli has shown to be utmost reliable and responsible company with qualified personnel and modern equipment to perform voluminous inspection projects with high requirements.

Hereby can we express our best recommendations.
